- Moreover No need to create Meeting ID for each session
- Pocket Study will manage everything !!

**Start your online lectures
via Pocket Study now !**

Comparison of Pocket Study v/s other virtual classroom platforms

Zoom/other virtual class platform	Pocket Study
Every time need to share link/ Meeting Id	Classwise students can directly join through App
No concept of lesson planning based session	All the live classes are organised in lesson planning structure
Not possible to access recorded session as a library of video content	Live classes can be automatically recorded & stored on server for future access to concerned students
No concept of attendance	Can get report of students attended all live classes
Not possible to centrally monitor class & subject wise sessions	It's designed for education and having central monitoring features
Not possible to share materials or other resources	Teachers can share relevant topic wise learning resources on the same platform
No concept like sharing audio note flash cards	It's an interesting new way of learning through Audio technology and Flash cards
Anyone with meeting Id/password can join	Only those who are given access of the mobile app through registered mobile number can access
Issues of data security etc	Highly secured platform with no third party data sharing commitment. We charge for our services.
No inbuilt video player integration	YouTube in built player, Vimeo integration etc
No search mechanism to access content	Student can search with keyword/topic to access content
No integration with ERP	Integrated with MyClassCampus ERP

Create your Digital Academy on POCKET STUDY App Now
